homeotto

HomeOtto Smart Thermostat
Model T201

Quickstart Guide

Physical Device Operation

Ensure the thermostat is in hold mode (displayed top left) by cycling through using "F". If any house icons (top right) are displayed it will not work properly with your system.

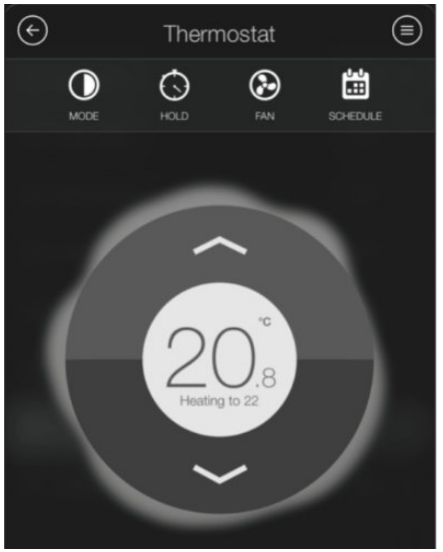

Please use the HomeOtto app to control this thermostat

Set Time: Hold the time setting button for 3 seconds. Press it to cycle through year, month, day, hour, and minute respectively. Adjust using up/down and save by pressing "F".
Clear Filter Warning: Press "F" until a house icon appears in the top right. Hold the fan setting button for 3 seconds. Press "F" until Hold is displayed in the top left.

HomeOtto Phone App Control

Use the menu to adjust:
Mode: Heat or Cool
- Furnace or Air Conditioner
Hold: 2, 4, 6 hours
- Use to ignore schedule
Fan: Auto, On, Off
Schedule: Date/Time

Current room temperature is displayed in a large font in the center. The mode and temperature setpoint are displayed below.

Use the up and down arrows to adjust the temperature.

Note: If using the schedule, your temperature setpoint and mode *will automatically adjust based on what you set.* For help setting up your schedule please visit
